MISSOURI BOTANICAL GARDEN
GEORGE ENGELMANN PAPERS

T. S. Brandegee writes July 25 1875.

Menzelia

Hog back Menzelia

M. Chrysantha

On steep clayey slopes

biennial, single stem

branched upwards

flowers vespertine, late in summer

rosette of radical leaves

capsules full of seeds

Grape Creek Menzelia

(M. multiflora)

on broken rock

perennial, many stems

flowers vespertine early in Summer

no rosette

seeds ~~less~~ numerous

Mentzelia chrysantha n sp.

perennis (?) ; ramosissima caule albo ~~hispido~~ asperulo ;
foliis ovatis s. lanceolatis, sinuato-dentatis
inferioribus versus basin acquantibus ; supremis
sepius late ovatis
floribus ~~ovatis~~ oppositis foliis ~~sup~~ terminalibus
breviter pedicellatis ~~ovatis~~ ovatis - oblongis
pet calycis laciniis lanceolat - subulatis
tubo longioribus
petalis 8 ~~10~~ lanceolatis acutis longe unguiculatis
aureis
capsula cylindrica s. ovata
sem. ovata compressa, varie foveolata
angulata marginata nec alata.

Root

Common Central hills, near Canon City
Colo Aspen Mts Wilkes Fraker, Aug. 1874
second Shockley
Altogether common etc
Roots long & fleshy, apparently perennial (not persistent as in the biennials)
Stems 2 feet high; leaves 6-3 inches long
1/4 - 1 1/2 inches wide - more or less
dentate, upper often entire.
flowers 15-20 Sticky downy, op - brownish
green; petals 6-9 l. lg 2-3 l. wide.
usually less than 10, the same with attenuate
forms - ovary with 3 placentae 2 very often
Capsule 3 lines wide, - to 1/2 inch 5-6
~~inches~~ lines. 10-12 lines long; seeds very

normally margined (+) as below

Possibly near M. pumila as described by Torr & Gr. Flor. I. 535 but this is said to have small flowers, terminal (or) to gall + sides "ciliate"

(+) Seeds similar to those of Calochortus but much smaller and not ciliated but barely margined.

The golden yellow colour of the ~~flowers~~ gradually (or) becomes brown ~~that~~ seeds in drying so that after a time ~~they~~ it cannot be distinguished from that of the withered flowers; the same is the case in M. Leichtlin while the pale M. oligosperma retains their colour much better.
